

SECRET [REDACTED]

Executive Registry

77-8597

11 June 1977

NOTE FOR: The Director

18 JUL 1977

1. There are a number of items that I will be prepared to discuss with you early next week. I have most of the facts, figures and other data in hand and will be reviewing them over the weekend.

2. Included are data pertaining to retired annuitants and the questions that you have raised that have been outstanding now for some time. Also included are some recommendations that we will have for you about proposed GS-15 promotions within the Agency. We must make a decision on these soon. In a nut shell, I believe that what is now proposed will leave sufficient flexibility for you for your future plans, but I will have more facts for you early in the week.

3. I also have some background material for you which will answer your question about the extent to which Congress has been informed about [REDACTED]. We can't speak to the subject of how much AEC, FBI or others might have briefed Congress. We know from our own records that the Joint Committee on Atomic Energy, particularly Howard Baker, was rather fully informed. Quite apart from this aspect of [REDACTED] I wonder whether Cy Vance is well briefed on this. In connection with briefing Congress and other key officials in the Government, please bear in mind that CIA has only part of the story. Brzezinski, so far as I know, has it all.

5. Also this coming week -- somewhere near the end of the week -- I will be prepared to sit down with you and discuss the management process within the Agency per your request.
